Student demographics	11
Student backgrounds	12-13
Externships	14

Overview

For the past four years, Practicum has been training people of all backgrounds to enter the tech industry. We believe that tech is open to everyone, and we've gotten pretty good at putting this belief into practice.

This is our second report, showing all graduate outcomes through the end of 2022.

1000+

alumni since 2019

87%

find a tech job within
six months of graduation

Mostly beginners

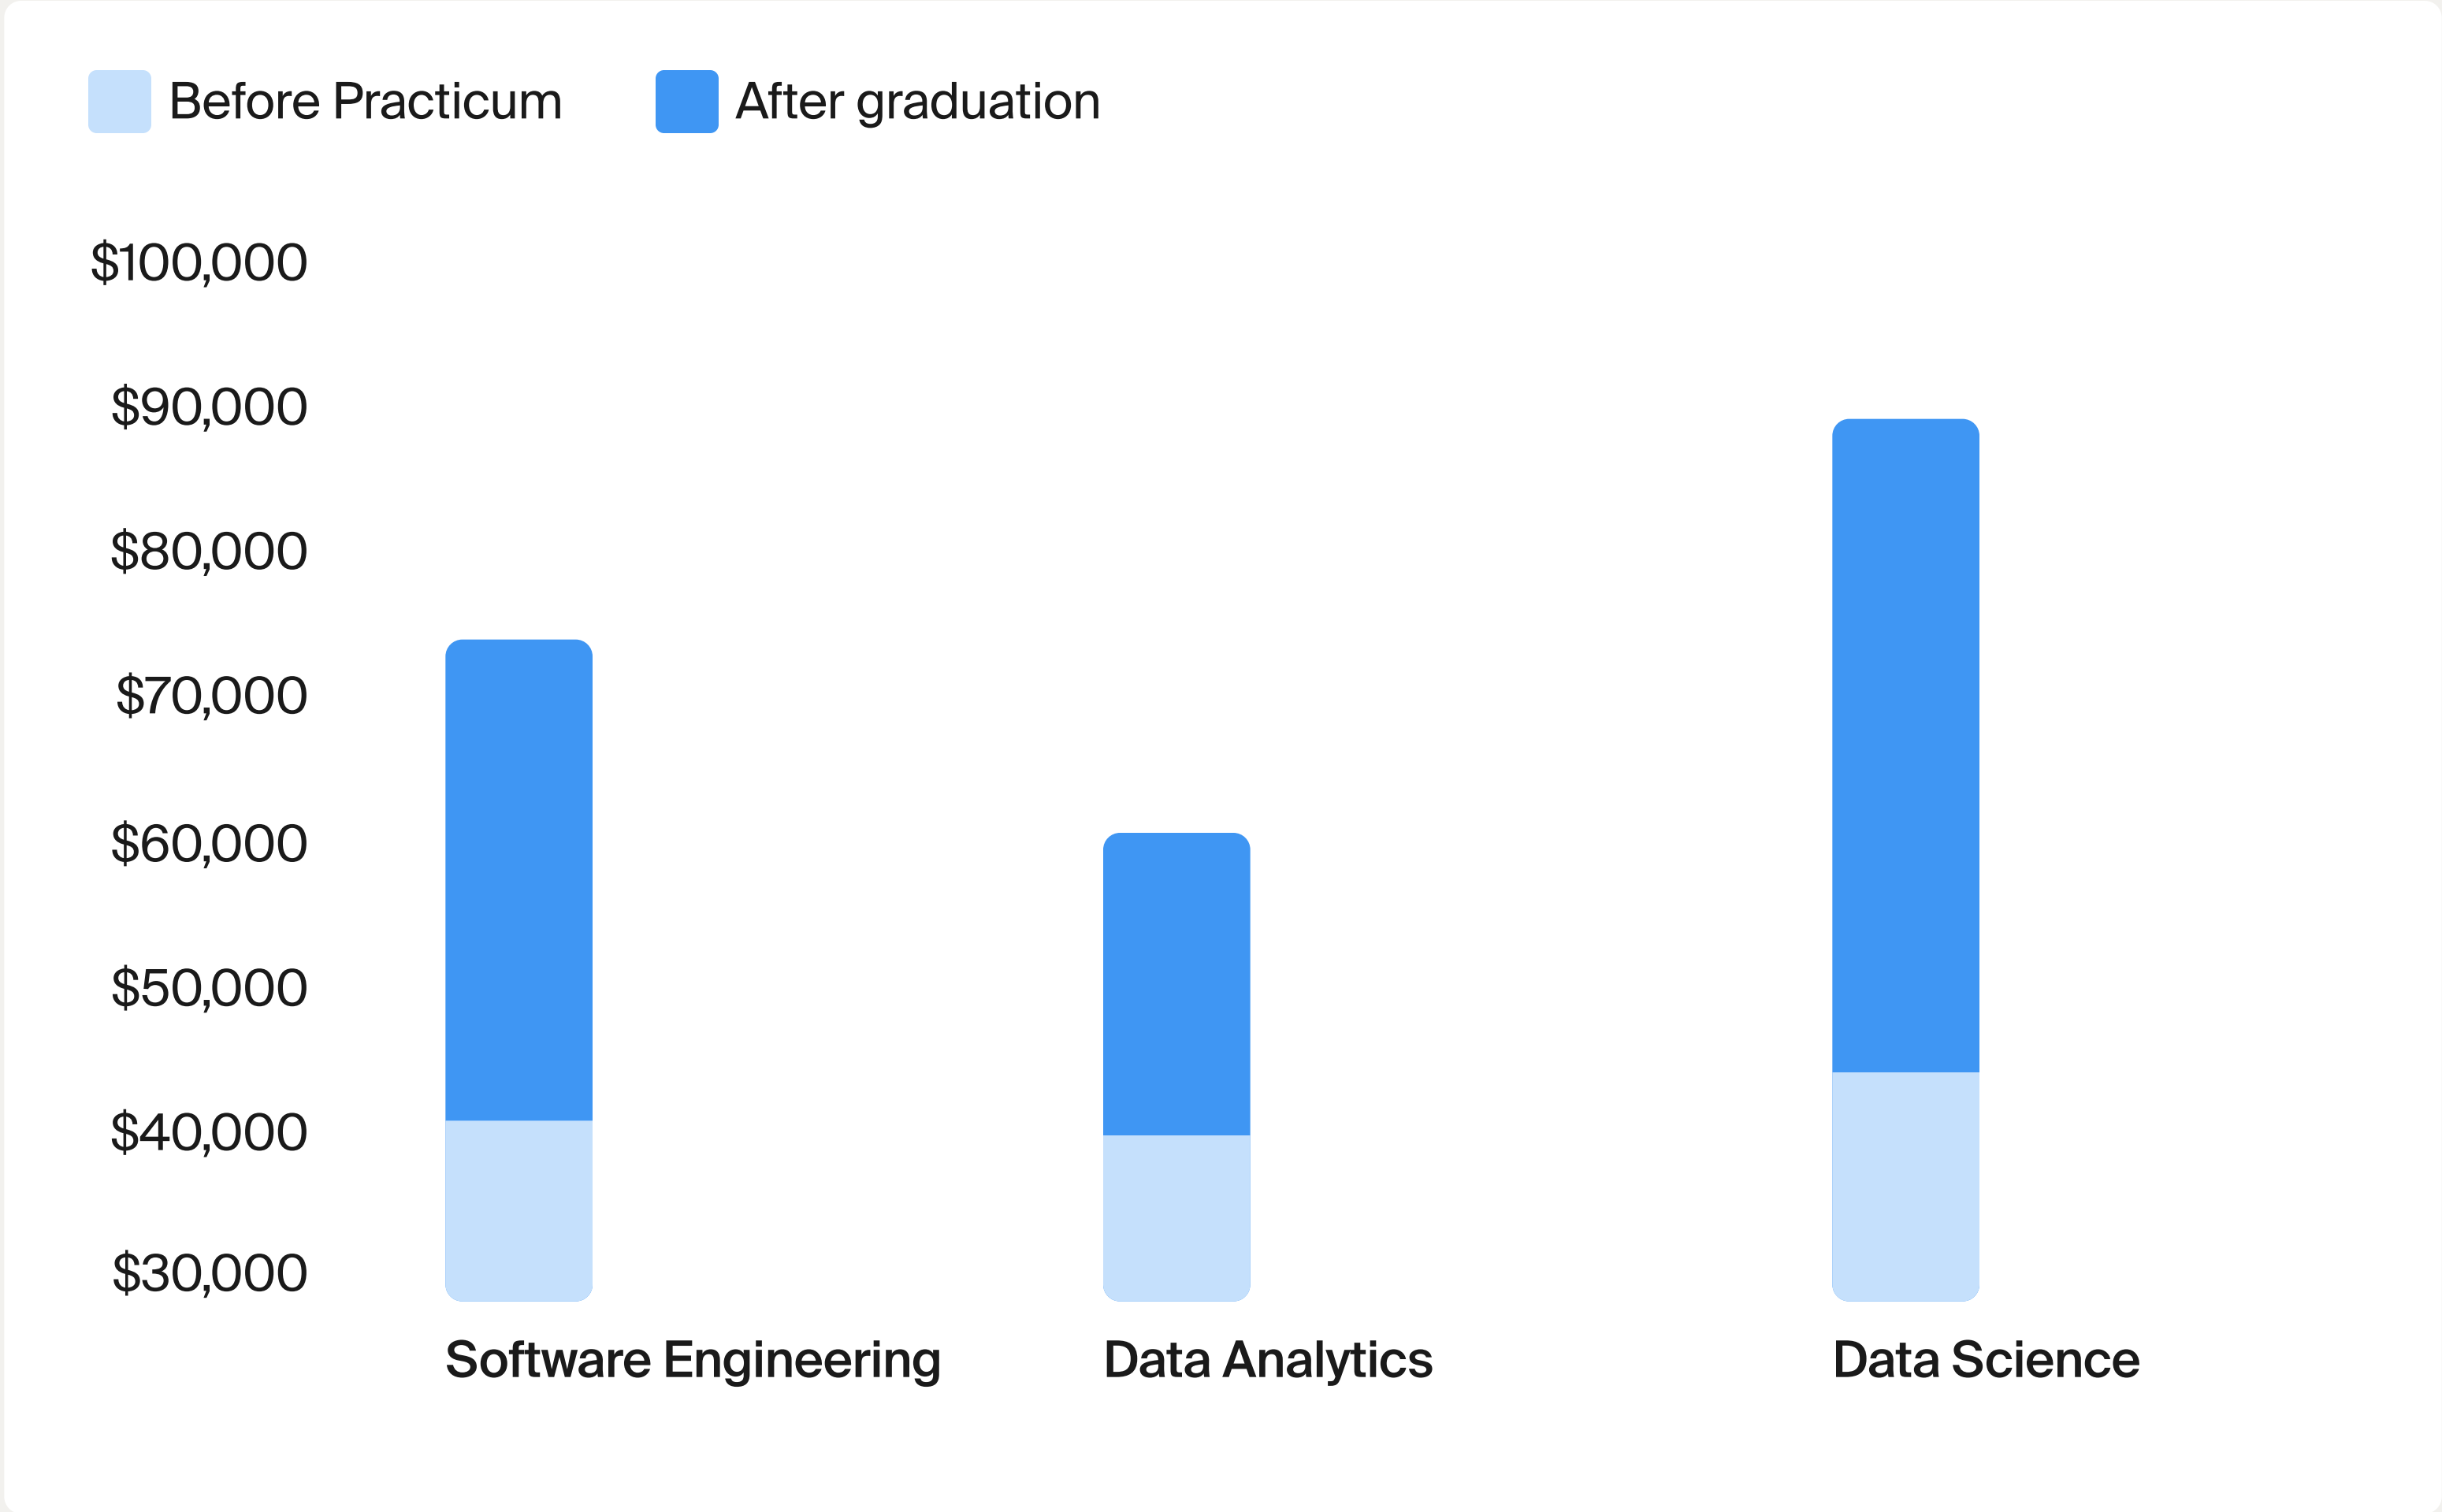

The majority of our students are not particularly tech-savvy, used to change careers frequently, or are stuck in low-paying jobs.

Key numbers

The outcomes presented in this report were collected through an online survey of 1613 alumni who'd graduated before 2H 2022 and reported working in a field relevant to their training.

	Software Engineering Bootcamp	Data Analytics Bootcamp	Data Science Bootcamp
Employment rate	88%	84%	87%
Median salary	\$75,100	\$62,500	\$89,000
Hired within	180 days	180 days	180 days

Salaries

Graduates see a return on investment just two months after getting hired.

Salary increase

+\$29,100 / 63%

Software Engineering

+\$21,500 / 52%

Data Analytics

+\$42,000 / 89%

Data Science

Time to employment

Half of Practicum's working alumni got hired before graduation. This is because our career preparation course is integrated into the curriculum. Students begin preparing for interviews when they're midway through the program.

53%

hired before
graduation

26%

hired 1-3 months after
graduation

21%

hired 3-6 months
after graduation

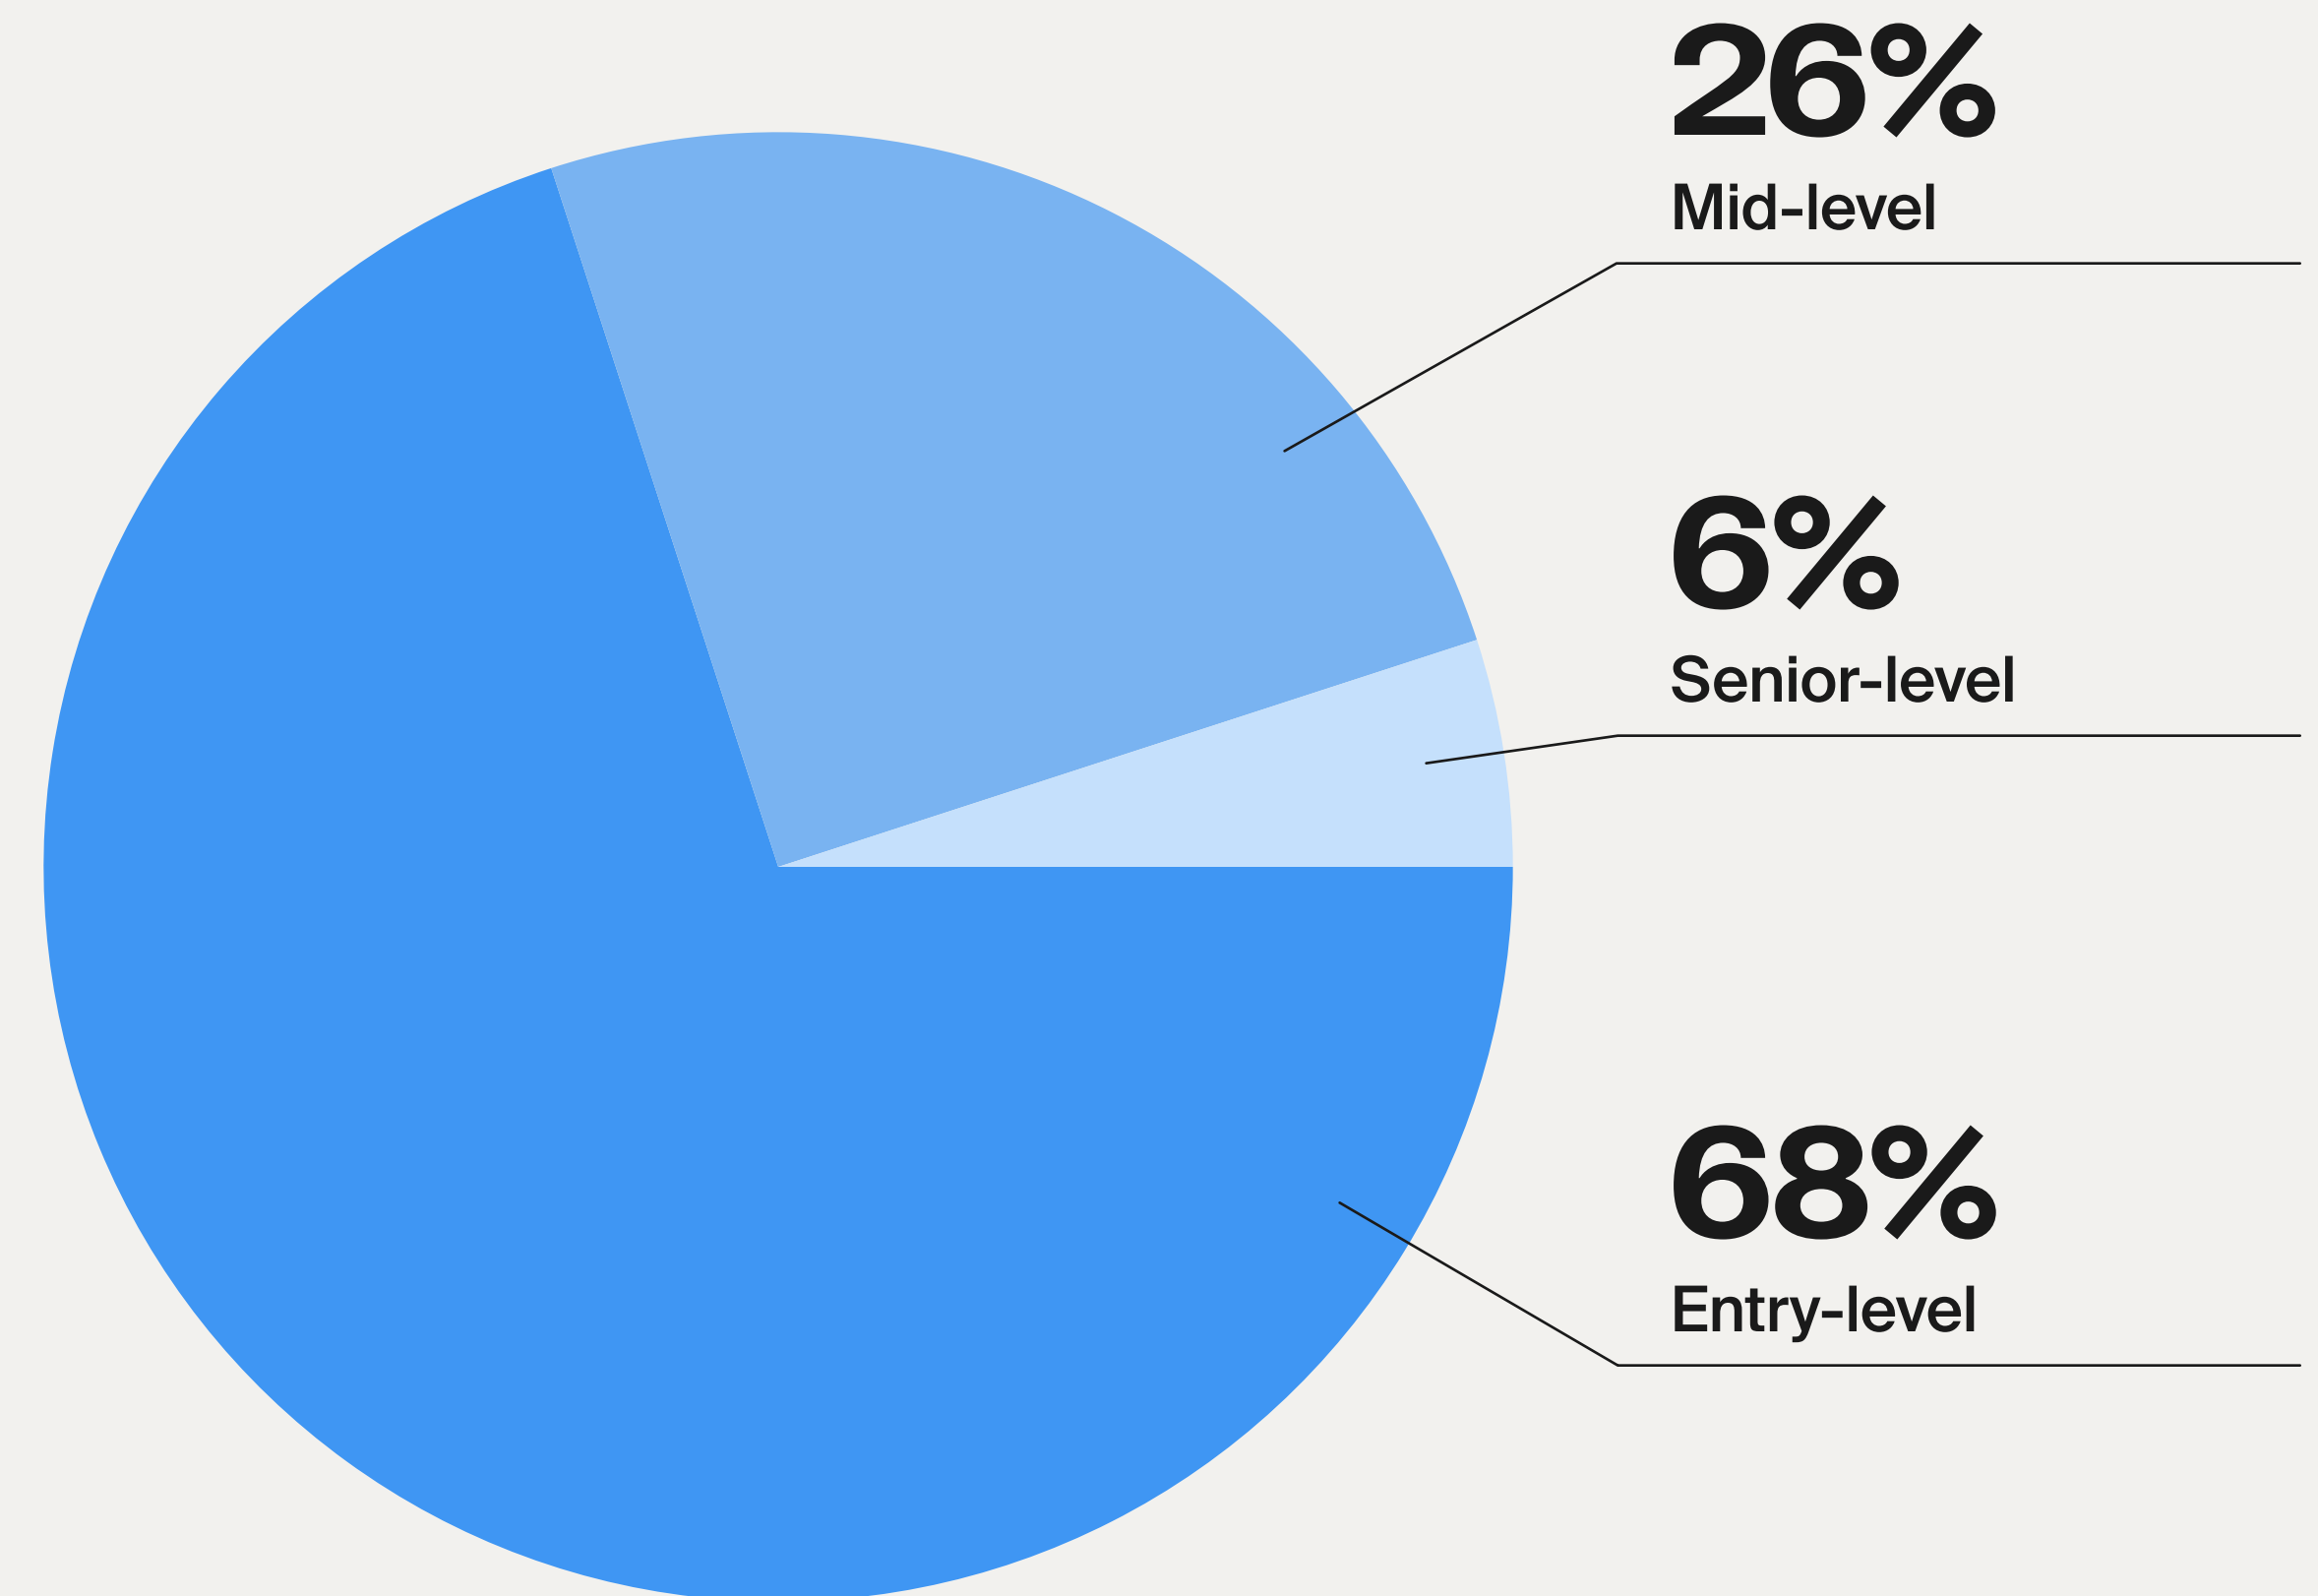

Employment status

Most of our grads accept full-time jobs in their field. Their top reasons for choosing full-time employment include wanting clarity in their work, a stable income, and growth opportunities.

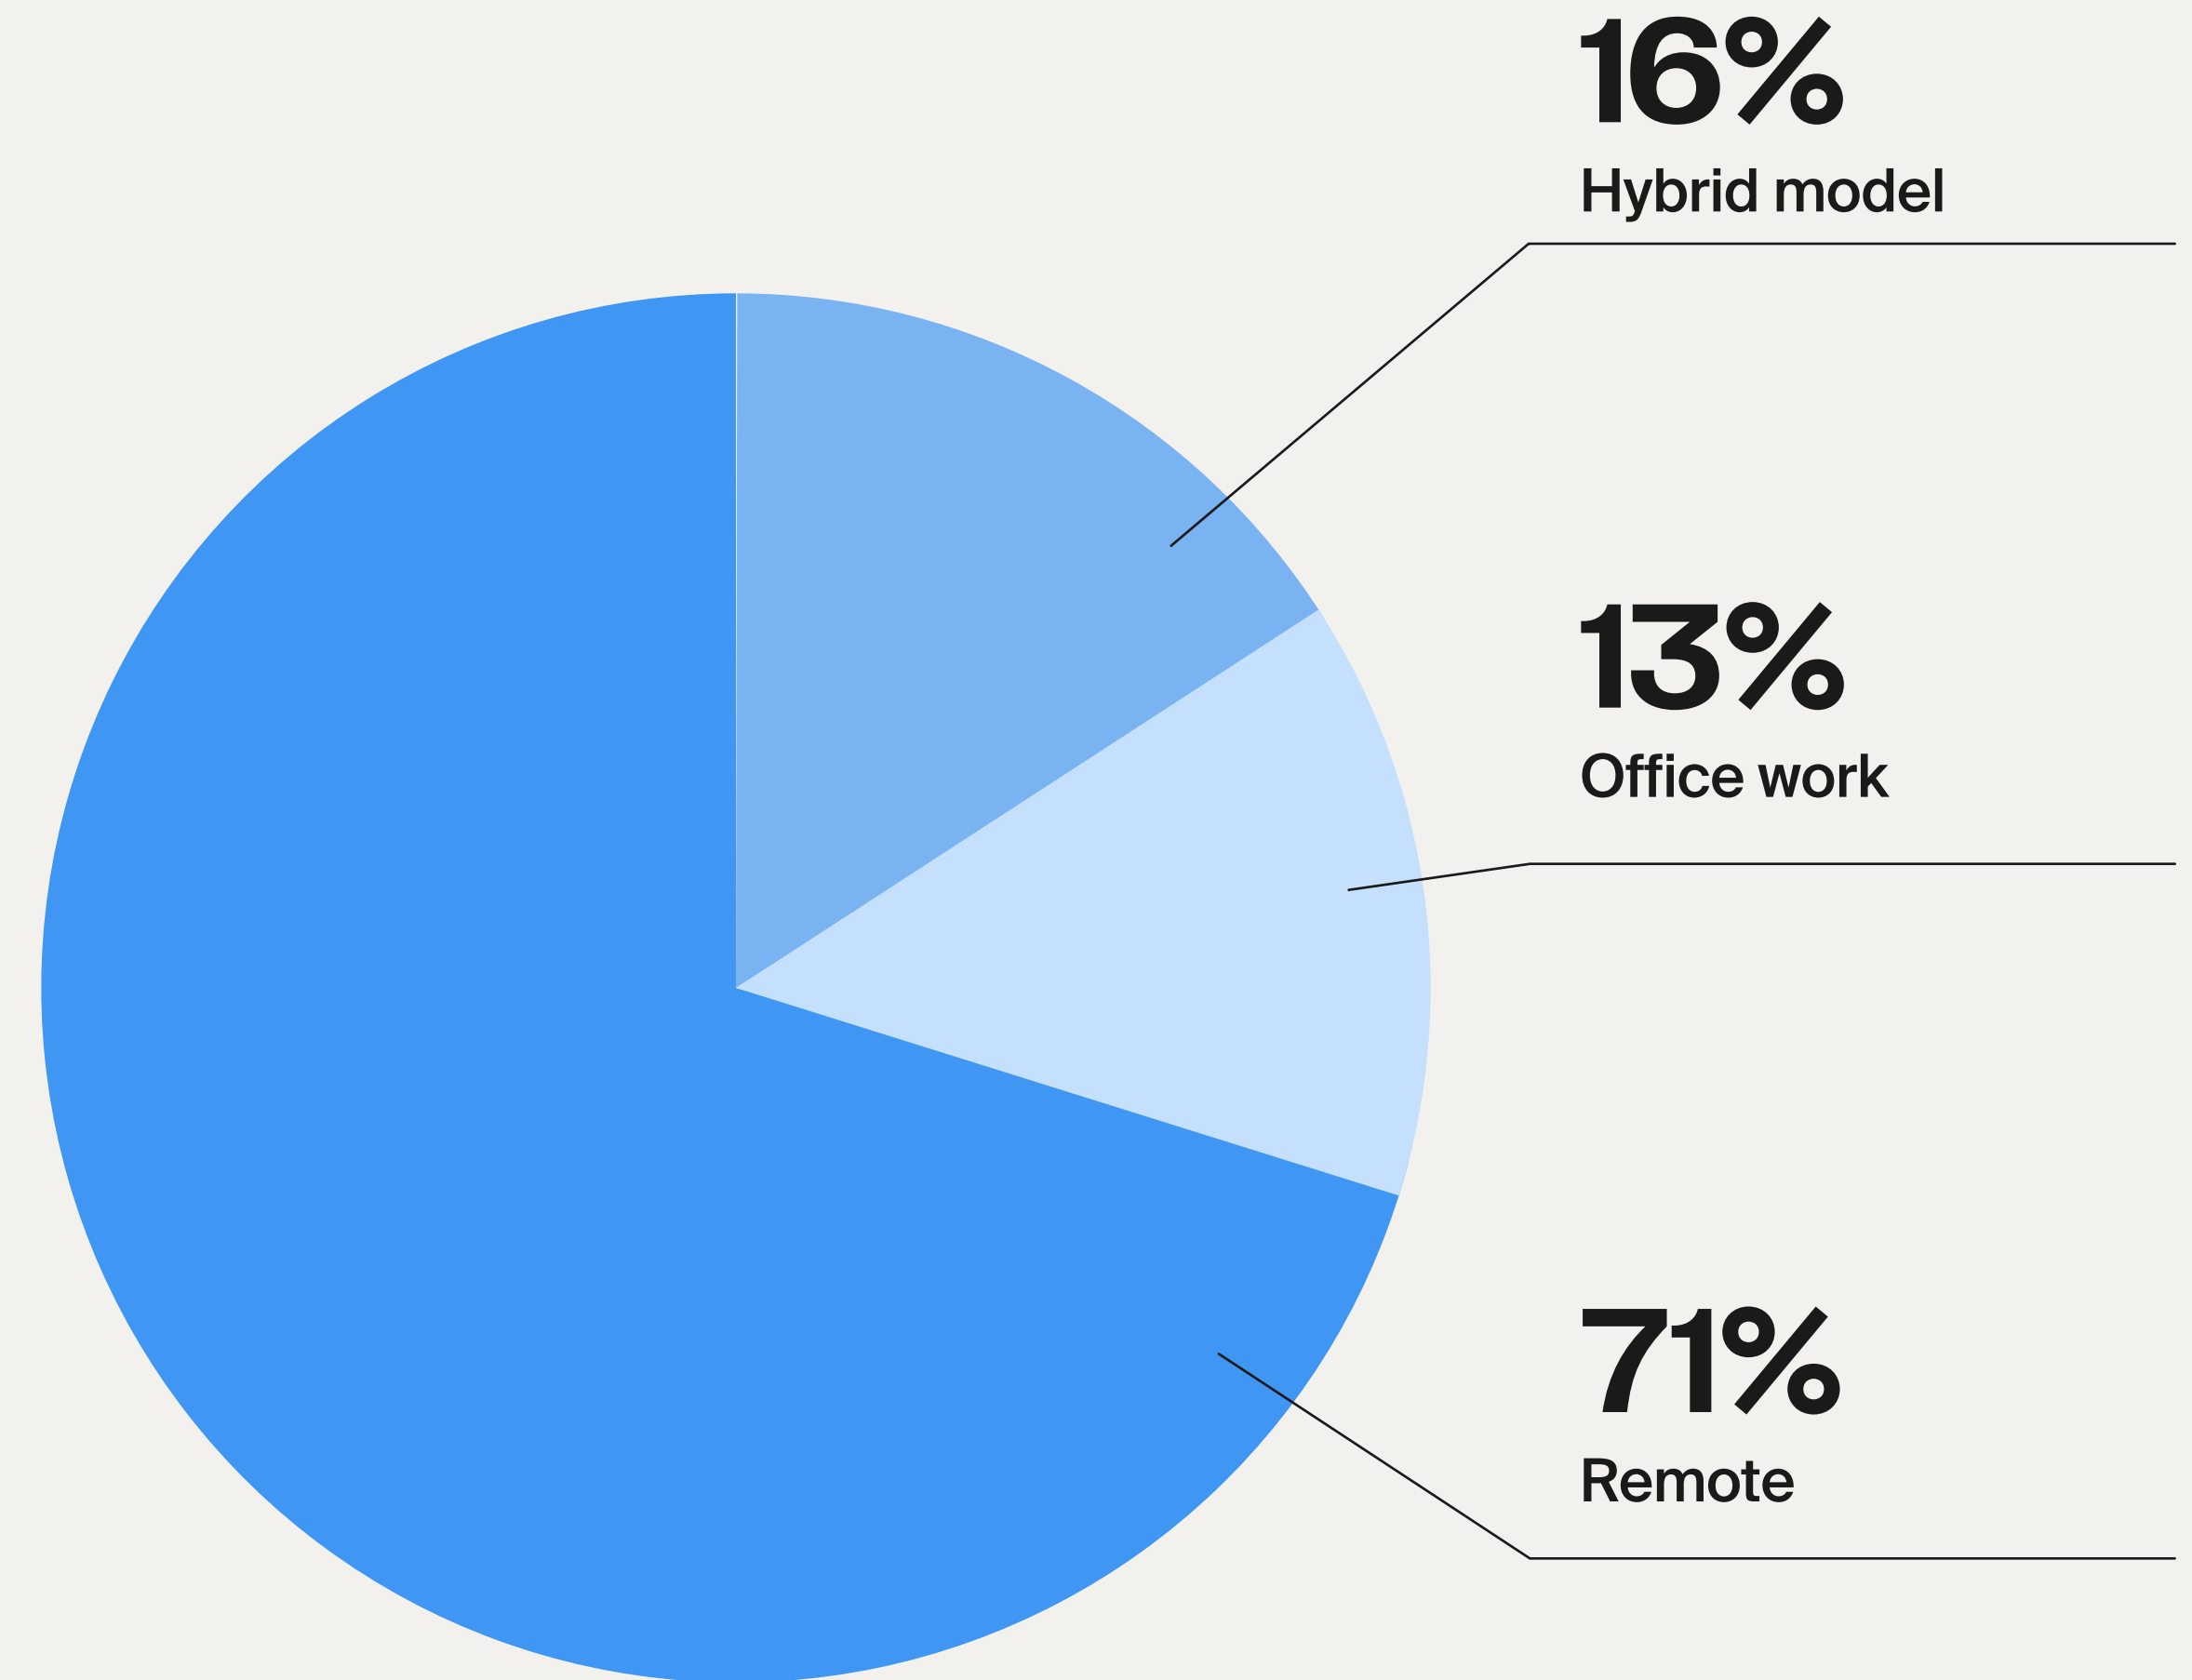

Position level & growth

Almost $\frac{1}{3}$ of our grads already hold middle or senior positions. Career growth is correlated with the experience that candidates bring with them from their previous careers.

Remote work

89% of workers in computer and mathematical occupations report having remote work options, with 52% able to work remotely full-time. Our grads tend to value the freedom afforded by their new careers, with 71% in fully remote jobs.

According to the third edition of the American Opportunity Survey by McKinsey & Company, 2022.

Success rates

These numbers represent graduates who got hired in their field within 6 months of graduation. Grads who found jobs after the 6-month mark were not counted.

Per-program employment rates are correlated with program length and market demand.

Software Engineering	88%
Data Analytics	84%
Data Science	87%

Demographics

Age

24–38

on average

Gender

42% women

in each program

Education

Bachelor's

is the degree held by most of our students, but community college degrees and professional certifications are also fairly common

Backgrounds

Income

\$46,000

median salary before
graduation

Location

76%

from suburban areas
& smaller cities, i.e. not
New York City, San Francisco Bay Area,
or Los Angeles

Knowledge

**Mostly
beginners**

The majority of our students are
not particularly tech-savvy, used to change
careers frequently, or are stuck making low
wages as bartenders, school teachers,
mechanics, counselors, etc.

The majority of our students have come from education, customer service, and STEM

21%
